Western Canada Oil and Gas Manufacturing Company Expands into Windsor-Essex

Windsor-Essex County, Ontario - Wednesday, December 21, 2011 - Dynamic Solutions Inc. announced today that they will be expanding its manufacturing operations to the Windsor-Essex Region.

Dynamic Solutions Inc. is a leading Canadian owned and operated company servicing the oil and gas market. Its head office is located in Red Deer, Alberta, Canada, supporting operations around the globe in regions that include: North America, Europe, Asia, Middle East, Africa and Australia.

Dynamic Solutions specializes in the design, manufacturing and operation of coiled tubing downhole tools used in well bore technology. Currently 95% of their machining requirements are outsourced to a third party; the new Windsor-Essex facility will bring this work in-house. They have select an existing building for their operation, expected to open in the spring, and are actively recruiting for an Operations Manager. Company officials are planning a visit to the region in January to conduct interviews and meet with key individuals in support of this investment.

*"Our growth has been quite rapid," explained **Leigh McDiarmid, General Manager Dynamic Solutions Inc.** Dynamic Solutions Inc was incorporated in 2006. "We currently employ 50 people in the oil and gas service sector in western Canada. Due to ever increasing demand for our products and services, Dynamic's manufacturing division requires high volume production which can only be obtained by opening a large manufacturing facility. Windsor has been selected to be our manufacturing center due to its highly skilled workforce and rich history in advanced manufacturing. When in full production the Windsor-Essex facility will employ 40 people. Dynamic will double its workforce through our Windsor expansion, an opportunity that we are greatly looking forward to in 2012!"*

Essex County Warden, Tom Bain said, *"We are very pleased to welcome Dynamic Solutions Inc. to our region and offer to them our utmost support and assistance. This investment once again represents progress in our diversification efforts to make this region the destination of choice for future investors."*

"We are moving toward a diversified economy that's getting better all the time. There is no doubt in my mind, that in the coming year, the Windsor-Essex region will be the place to be in terms of location and innovation. Thank you for choosing Windsor –Essex and welcome Dynamic Solutions Inc. to our region." added **Ron Gaudet, CEO of the WindsorEssex Economic Development Corporation.**

"As we diversify the business economy, we also diversify employment opportunities for skilled workers in advanced manufacturing. We were very pleased to be part of this project, and to be able to provide up to date availability of potential employees in our region through the W.E. Skills Database to Dynamic Solutions, and are excited to welcome them to our region." – **Donna Marentette, Workforce Windsor-Essex.**

A career positing for an Operations Manager will be advertised in The Windsor Star employment section on Thursday, December 22, 2011, and on the WindsorEssex Economic Development Corporation's web site and through WEEDC's social media channels. Candidates can apply by sending resume to Dynamic@choosewindsorsex.com by January 13, 2012.

About Dynamic Solutions Inc. – Dynamic Solutions specializes in the design, manufacturing and operation of coiled tubing downhole tools. We have the ability to take a concept from initiation to completion to operation. With in-house research, engineering, development, manufacturing and field personnel, as well as tool brokering, we provide one-stop solutions for our customers.

As a leader in coiled tubing technology and innovative designs, our tools are manufactured to the highest standards in order to withstand the most rigorous downhole applications. DSI tools are a cost-effective means of improving reserve recovery while lowering operating costs. Professional analysis of each well bore helps provide our clients with the best tool for the job, while our in-house research and development allows us to design and create tools specific to any situation.

We support our products in the field, as well as offering support for general coiled tubing operations. Our field technicians work in conjunction with the coiled tubing unit and crew, as well as any other service company on site, to ensure that all aspects of the job are covered and performed correctly, while being completed on time and on budget.

Customers are an integral part of the DSI team, working with us so we can deliver innovative products that exceed expectations.

Dynamic Solutions Inc.'s head office is located in Red Deer, Alberta, Canada, supporting operations around the globe.
